1 Osteopathic Treatment 80 min.

My name is Marco Cianci, and I am an Osteopath specialized in Posturology, Paediatric Osteopathy and Massage Therapist.

I treat somatic dysfunctions, i.e., all those structures that are part of the musculoskeletal system. Through an accurate postural assessment and specific tests, areas of increased tension will be identified and regulated using various techniques.

OSTEOPATHY FOR CHILDREN AND PREGNANT WOMEN

What is it?

Paediatric osteopathy is a branch of the aforementioned discipline that deals with preventing and treating all those ailments that, if not corrected in time, could interfere with the normal development of the child from the first post-natal days to adulthood. The techniques used to treat babies and toddlers are as gentle, light and non-invasive as if they were a cuddle, so that it is enjoyable for the little one too.

Why take your baby/child to the paediatric osteopath?

From gestation to delivery, it is possible for the newborn child to suffer compressions and stretching of the developing musculoskeletal system, which can lead to minor dysfunctions of the skull, spine and pelvis.
